Connection Checklist Single Residential

1. Fill out and return Application. Show sketch of connection if mainline connection is needed.
2. Pay Connection Fee prior to construction with mainline inspection fee if applicable.
3. Project reviewed by IBSD Engineer if required. (Applicable to single residence not in subdivision)
4. Inform IBSD of construction schedule in advance of construction. Main line connections must be inspected - 2 business days (48 hours) advance notice required.
5. A one-year warranty is required on service connections and road repair and begins upon IBSD acceptance.

As a reminder:

- Prior to cutting into a road or disturbing any Right-of-Way the contractor (or owner) must contact the agency responsible for the maintenance of the ROW i.e. city, county, state, or private and obtain permission/permit to excavate in ROW.
- Contractor (or owner) is also responsible to obtain permission from the local jurisdiction to limit lane access or close and detour a road. Contractor is responsible for all safety measures, cones, signs, flaggers, etc. required to maintain traffic safely through the construction area.
- Connection should be made per City of Idaho Falls Standard Specifications standard drawing 700-5 and "Idaho Standard for Public Works Construction" standard drawing SD-511.
- Inspection should be performed by qualified person or entity selected by the District who will submit an inspection report and picture.
- Return any disturbed ROW to existing condition and repair roadway cuts per applicable standards.
